

ELİF OBAN’S VIEWS ABOUT ELECTION OF ÜMİT BOYNER AS THE CHAIRMAN OF TUSİAD

Established under the leadership of the prominent leaders of the Turkish industry, TUSİAD has become one of the biggest and most influential institutions of Turkey. TUSİAD, making great contributions to the economy by guiding Turkish entrepreneurs and the business world, is providing support to the establishments and institutions with its opinions in different fields from education to business world in Turkey; the association reflects Turkey’s modern face, educated and professional labor force, important examples of entrepreneurship, and diligence to environmental issues on the best platforms in a professional genre.

I believe that women managers are of great importance in TUSİAD’s becoming an important decision-making mechanism observing social consciousness and developing successful projects in accordance with increasing globalization in the world. I am proud on my own and country’s behalf that a woman manager has been appointed to the chairmanship of TUSİAD with a recent change of duty. I have full faith that Ümit Boyner, known with her positive and sensitive solution-oriented approach to social consciousness, will properly carry the values that TUSİAD has preserved and raised so far. As a woman manager in the business world, I am sure that we will continue to represent the independent, modern, successful and sensitive aspects of Turkey with the help of important institutions such as TUSİAD in abroad as well.
